This light has three main levels (High, Medium, and Low) and a beacon-strobe mode.

When the light is Off:
- One short-click turns on the light to High.
- Two short-clicks turn on the light to Medium.
- Three short-clicks turn on the light to beacon-strobe mode.

To turn the light ON and HOLD: Double-click (G7) turns on the Low and then Medium and High. Release at the desired level.

IMPORTANT SAFETY INSTRUCTIONS

- To reduce the risk of injury, close supervision is necessary when the product is used near children.
- To reduce the risk of electrical shock, do not expose battery or internal components to water or other liquids.
- Use only recommended batteries.
- Remove batteries from flashlight before performing any routine maintenance or cleaning.
- Do not disassemble the flashlight. The LED cannot be replaced.
- Do not expose flashlight to corrosive or explosive atmospheres. Internal sparks may ignite.
- Do not submerge the flashlight in water.
- Do not expose battery or internal flashlight components to rain.

Under extreme usage or temperature conditions, battery leakage may occur. If liquid comes in contact with your skin, wash immediately with soap and water. If liquid gets in your eyes, flush them with clean water for at least 10 minutes, then seek immediate medical attention.

- Do not crush, drop or damage batteries. Do not use batteries that have been dropped or received a sharp blow. A damaged battery is subject to explosion. Use a damaged battery can result in serious personal injury.
- Save these instructions. Refer to them frequently and use them to instruct others who may use this product.

ADVANCED OPERATION

To use another sub-level

For each of the three main levels (High, Medium, and Low) levels, there are two corresponding sub-levels. H1 and H2, M1 and M2, and L1 and L2.

1. G6: Go to a main level with short-clicks or press-and-hold.
2. Double-click 6 times to enter the programming mode for that main level.
3. On subsequent double-clicks the light will cycle through different brightness levels in H1, M2 and L2.
4. When you have the choice you want, exit the programming mode by performing a short-click.

To change levels after the light is on
When the light is On, press-and-hold to cycle through Low, Medium, and High. Release at the desired level. Note that the light always cycles from low regardless which level you are currently in.

Beacon and Strobes

The beacon-strobe mode can be accessed with 3 clicks when the light is Off. Once in beacon-beacon mode, you can double-click to cycle through different types of beacons and strobes. Beacon-strobe settings are memorized when the light is turned off and through battery changes.

Battery Indicator

The LED (1 (t to 4) flashings of the main LED to give a rough estimate of the remaining capacity of the battery. The battery indicator can be accessed with 4 short-clicks when the light is Off.

Multiple UI Groups

This product has three UI groups, G5, G6, and G7. The G5, set as the factory default, can be selected with 5 clicks from Off, while G6 and G7 can be selected with 6 clicks and 7 clicks from Off respectively. UI group selections are memorized after the light is turned off and through battery changes.

In all three UI groups, off: 1-click to H (H1 or H2), 2-click to M (M1 or M2), press and hold to cycle from L1 (L1 or L2), and then to H and M.

In the G5 UI group, brightness levels of the H1, M1 and L1 are fixed, while the brightness levels of G6 and G7 are adjustable. G6 and G7 allow all six (H1, M1, M2, L1, L2, and L3) modes to be programmed of the 12 available brightness levels. To modify UI group:

1. Enter the G6 or G7 with 6 or 7 clicks from Off.
2. Double-click 6 times at H1, G6, L2 to enter the programming mode for that level.
3. One short-clicking the programming click to go up one level and triple-click to go down one level. Use 1-click to exit the programming mode.
4. If needed, use 15, 18, and 21 clicks from Off, to reset to the factory default settings of the G5, G6, and G7 UI groups.
